

## Kantech Plus

Technology Upgrade – A Trade-in Program

### Upgrade & Update Your Existing Access Control System and SAVE!

If your current access control system is failing to meet your security/business needs, has maintenance and performance issues, reached its end of life, or has features that do not support mobile applications, then it's time for an upgrade.

Receive leading-edge features and a 15% savings when you upgrade your existing access control system with Kantech EntraPass - backed by 30 years of innovation, integrity and exceptional user experience. Kantech EntraPass provides premium security capabilities including the ability to monitor your security, and view video footage and intrusion alarms on the go with the EntraPass Go mobile app, all at an affordable price.

#### Special Offer Includes:

- Removal of your current system and replacement with a Kantech system (EntraPass software and KT-400 and KT-1 door controllers)
- In most cases, re-use of existing cabling and door hardware
- No need to reissue cards! Import your existing user database and reuse existing cards making the upgrade seamless, with minimal down-time and cost. Kantech will test to verify compatibility.

## Top Reasons to Switch to a Kantech EntraPass System

### ✓ **EntraPass On The Go**

Access your system remotely with EntraPass Go mobile app. You can even view video and lock/unlock doors remotely, saving valuable time. iOS and Android compatible.

### ✓ **Investment Protection**

Kantech technologies are engineered with the goal of keeping your system moving forward which keeps money in your pocket. Backward compatibility is one of our key strengths. Door controllers from 30 years ago are still compatible with current EntraPass software providing peace of mind that EntraPass will continue to be supported for years to come.

### ✓ **Loaded with Features for Exceptional User Experience**

- Email Notifications – Receive emails from the system based on what you want to know and when.
- Photo ID Badging – create sophisticated badges customized for your particular application.
- Unsurpassed Video and Intrusion Integration – EntraPass, Exacq video and DSC intrusion technologies are integrated for one simplified security experience.
- Microsoft Active Directory Support – Manage EntraPass operators using Microsoft Active Directory with a synch feature to eliminate the manual creation and maintenance of Active Directory users.
- Web Client Access – access your access control, video and intrusion information from anywhere, anytime using the Web.
- Ease of Use – Kantech offers innovative and technologically progressive solutions that are easy to deploy, configure and manage, leaving you free to tackle other important issues.

### ✓ **Grow as Your Company Grows**

Our system grows as your company grows with exceptional access control, video and intrusion scalability capabilities for a complete security solution.

### ✓ **Great Cost Savings**

Replace your existing system and save 15%!
